

A Summary of President Trump's Accomplishments So Far

You won't hear this from the "fake news" media. They like to focus on "fake scandals" – such as their "Trump Colluded with Russia" hoax or his latest tweets. The "fake news" media won't tell you what President Trump has actually accomplished in his first year in office – which is truly historic.

For example . . .

The Trump Economic Record

- ✓ **President Trump** pushed Congress to enact the largest tax cuts for the American people since President Reagan. He cut the top tax rate on businesses from 35% to 21% – to make America an attractive place to build a business again.
- ✓ **President Trump** has signed more laws to slash unnecessary federal regulations and bureaucratic red tape than any President in American history. This slashing of regulations is saving American businesses more than \$18 billion a year in costs.
- ✓ **President Trump** is emphasizing making America energy-independent. He has approved the building of the Keystone XL and Dakota Access pipelines.
- ✓ **President Trump** has saved the American people \$3 TRILLION over the next 10 years by withdrawing from the so-called Paris climate accord.
- ✓ The economy under **President Trump** is growing twice as fast as it was under Barack Obama.
- ✓ The U.S. economy has created more than 3,000,000 new jobs under **President Trump**. And the unemployment rate in the manufacturing sector has dropped to a record low of just 2.6%.
- ✓ More than \$8 TRILLION in new wealth has been created under **President Trump**.
- ✓ Consumer confidence (which drives economic growth) is at an 18-year high under **President Trump**.
- ✓ Average hourly wages are up. As a result, welfare rolls are decreasing as more Americans are getting off the sofa and going to work. Food stamp use has plunged to an 8-year low under **President Trump**.

Why is this happening?

Simple. Unlike Barack Obama, President Trump is not waking up every morning thinking up new ways to attack American businesses. Unlike the socialistic, anti-capitalist Obama, President Trump is pro-business and pro-capitalism. As a result, we have returned to Reagan-levels of economic growth.
