

Ending ObamaCare

- ✓ When Congress was unable to get the votes to completely END **ObamaCare**, **President Trump** canceled much of **ObamaCare** on his own. Specifically, President Trump . . .
 - 1) Ended the billions of dollars in illegal taxpayer subsidies for insurance companies.
 - 2) Made it easier for lower and middle income folks to buy health insurance by allowing people to buy plans off the exchanges that are half the cost of the ObamaCare Bronze plans.
 - 3) Gave the green light to the formation of association and co-op plans, which would allow small businesses and even individuals to group together across state lines, giving them the same purchasing clout as large multi-state employers.
 - 4) Announced the IRS will no longer fine people who don't have health insurance because, if they can't afford the health insurance, they probably can't afford the fines either.
 - 5) Ended the outrageous Obama requirement that you must purchase health insurance that includes coverage for abortion.
- ✓ Upon **President Trump's** urging, Congress ended the **ObamaCare** mandate that all individuals must purchase a government-approved health insurance plan, which Congress then passed.
- ✓ **President Trump** continues to push weak Republicans in the U.S. Senate to keep their promise to completely repeal and replace ObamaCare.

Securing America's Borders

- ✓ **Illegal border crossings** have dropped 25% under **President Trump**. In fact, illegal aliens are now leaving America on their own. President Trump is doubling the number of border patrol officers.
- ✓ **President Trump** has declared war on the 10,000 ultra-violent MS-13 gang members who are in the United States. Most of these gang members came to the United States during President Obama's "open border" policies – when President Obama deliberately ignored U.S. immigration law in order to create more voters for his socialist agenda.

(Over, please)
