DEEP STATE / SHADOW GOVERNMENT

106

The key to resisting and fighting the DS/SG is using the U.S. & Maine Constitutions. It is imperative for voters to understand what real true and honest politics is. And, for all sides to understand that there must be a neutral dimension to pacify everyone's needs and wants, while at the same time, protecting the citizens from corrupt people working in our governments. Our founding fathers did this, for us, by producing an understandable written constitution that recognized and mandated protections under a Democratic style government while overseen by a Republic. No government on this earth has ever reached the level of protections that the U.S. Constitution provides!

In 1789, the first Congress of the United States met. The first article of business was to protect the powers, mandates and intent of the Constitution while guaranteeing compliance of those responsible for following the newly authored Constitution. Because a public/civil servant's word and bond, at that time, was to insure the principles of freedom & liberty. President Washington and Vice President John Adams introduced "The OATH of Office". Article 1, Chapter 1, Sections 1-4. Upping the ante of honesty, a penalty was added to insure compliance to following and supporting the Constitution.

The founding fathers of our U.S & Maine Constitution were honorable. There is no comparison to the wimpy-flaccid word & bond of today's public/civil servants. With the degradation and integrity of society, which our public/civil servants are selected from, they lack the honesty that is needed to be trusted for what they do and say. In the eyes of these hypocrites, the once sacred OATH has been reduced to a mere ceremony.

The reason why I delve into this descriptive attack is, the followers and voters of both political parties must realize and understand that they have been used and abused. The leaders and active members that support the leaders of both parties take advantage of the registered voters by placating to their fears and emotions, by keeping both sides separated and fighting each others beliefs and emotions. Like a good magician, you are deceived and you never see the real trick.

My contention is, if the voters in both parties were able to understand that real, honest and truthful politics is based on a diverse set of Constitutional principles and not single issues as the DS/SG would like you to believe. For example, as the election period is counted down, you will see my point, as the negative political advertisements and letters

to the editors begin the single issues, false platitudes and slight of hand to draw your attention away from those who have utilized the U.S. & Maine Constitutions properly.

Those who are from, or support, the DS/SG love this time of the year, because they are able to supplement their DS/SG with public/civil servants that are useful to their ideology and anti-American agenda's.

Please listen to those who say look into the candidate's history, but really do it and compare their candidate's usage of both Constitutions.
